

TABLE OF CONTENTS

- The region of integration is unbounded, e.g. $\int_1^\infty \frac{\sin x}{x} dx$

- The region of integration is unbounded, e.g. $\int_1^\infty \frac{\sin x}{x} dx$

$$\Delta x = \frac{b-a}{n} = \frac{\infty}{n} ???$$

An integral is **improper** if one or both of the following happen:

- The region of integration is unbounded, e.g. $\int_1^{\infty} \frac{\sin x}{x} dx$

$$\Delta x = \frac{b-a}{n} = \frac{\infty}{n} ???$$

- The integrand is unbounded over the interval, e.g. $\int_{-1}^1 \frac{1}{x^2} dx$

An integral is **improper** if one or both of the following happen:

- The region of integration is unbounded, e.g. $\int_1^{\infty} \frac{\sin x}{x} dx$

$$\Delta x = \frac{b-a}{n} = \frac{\infty}{n} ???$$

- The integrand is unbounded over the interval, e.g. $\int_{-1}^1 \frac{1}{x^2} dx$

$$f(0)\Delta x = ???$$

Strategy

In both cases, we eliminate the offending parts of the integral using limits.

$$\int_1^{\infty} \frac{\sin x}{x} dx =$$

$$\int_0^3 \frac{1}{x} dx =$$

If the limit doesn't exist, we say the integral **diverges**. Otherwise it **converges**.

$$\int_1^{\infty} \frac{1}{x} \, dx =$$

$$\begin{aligned}\int_1^{\infty} \frac{1}{x} \, dx &= \lim_{a \rightarrow \infty} \left[\int_1^a \frac{1}{x} \, dx \right] \\ &= \lim_{a \rightarrow \infty} [\log a] = \infty\end{aligned}$$

We say this integral **diverges** because the limit is not a number.

$$\begin{aligned}\int_1^{\infty} \frac{1}{x} \, dx &= \lim_{a \rightarrow \infty} \left[\int_1^a \frac{1}{x} \, dx \right] \\ &= \lim_{a \rightarrow \infty} [\log a] = \infty\end{aligned}$$

We say this integral **diverges** because the limit is not a number.

$$\begin{aligned}\int_1^{\infty} \frac{1}{x} \, dx &= \lim_{a \rightarrow \infty} \left[\int_1^a \frac{1}{x} \, dx \right] \\ &= \lim_{a \rightarrow \infty} [\log a] = \infty\end{aligned}$$

We say this integral **diverges** because the limit is not a number.

$$\begin{aligned}\int_1^{\infty} \frac{1}{x} \, dx &= \lim_{a \rightarrow \infty} \left[\int_1^a \frac{1}{x} \, dx \right] \\ &= \lim_{a \rightarrow \infty} [\log a] = \infty\end{aligned}$$

We say this integral **diverges** because the limit is not a number.

$$A \approx 2.3$$

$$\begin{aligned}\int_1^{\infty} \frac{1}{x} \, dx &= \lim_{a \rightarrow \infty} \left[\int_1^a \frac{1}{x} \, dx \right] \\ &= \lim_{a \rightarrow \infty} [\log a] = \infty\end{aligned}$$

We say this integral **diverges** because the limit is not a number.

$$A \approx 4.6$$

$$\begin{aligned}\int_1^{\infty} \frac{1}{x} \, dx &= \lim_{a \rightarrow \infty} \left[\int_1^a \frac{1}{x} \, dx \right] \\ &= \lim_{a \rightarrow \infty} [\log a] = \infty\end{aligned}$$

We say this integral **diverges** because the limit is not a number.

$$A \approx 6.9$$

$$\begin{aligned}\int_1^{\infty} \frac{1}{x} \, dx &= \lim_{a \rightarrow \infty} \left[\int_1^a \frac{1}{x} \, dx \right] \\ &= \lim_{a \rightarrow \infty} [\log a] = \infty\end{aligned}$$

We say this integral **diverges** because the limit is not a number.

$$A \approx 1000$$

$$\begin{aligned}\int_1^{\infty} \frac{1}{x} dx &= \lim_{a \rightarrow \infty} \left[\int_1^a \frac{1}{x} dx \right] \\ &= \lim_{a \rightarrow \infty} [\log a] = \infty\end{aligned}$$

We say this integral **diverges** because the limit is not a number.

$$A \approx 1000000$$

$$\begin{aligned}\int_1^{\infty} \frac{1}{x} dx &= \lim_{a \rightarrow \infty} \left[\int_1^a \frac{1}{x} dx \right] \\ &= \lim_{a \rightarrow \infty} [\log a] = \infty\end{aligned}$$

We say this integral **diverges** because the limit is not a number.

$A \approx 1000000000000$ etc

$$\int_1^{\infty} \frac{1}{x^2} dx =$$

$$\begin{aligned}\int_1^{\infty} \frac{1}{x^2} dx &= \lim_{a \rightarrow \infty} \left[\int_1^a \frac{1}{x^2} dx \right] \\ &= \lim_{a \rightarrow \infty} \left[-\frac{1}{a} + 1 \right] = 1\end{aligned}$$

We say this integral **converges** because the limit is a number.

$$\begin{aligned}\int_1^{\infty} \frac{1}{x^2} dx &= \lim_{a \rightarrow \infty} \left[\int_1^a \frac{1}{x^2} dx \right] \\ &= \lim_{a \rightarrow \infty} \left[-\frac{1}{a} + 1 \right] = 1\end{aligned}$$

We say this integral **converges** because the limit is a number.

$$\begin{aligned}\int_1^{\infty} \frac{1}{x^2} dx &= \lim_{a \rightarrow \infty} \left[\int_1^a \frac{1}{x^2} dx \right] \\ &= \lim_{a \rightarrow \infty} \left[-\frac{1}{a} + 1 \right] = 1\end{aligned}$$

We say this integral **converges** because the limit is a number.

$$\begin{aligned}\int_1^{\infty} \frac{1}{x^2} dx &= \lim_{a \rightarrow \infty} \left[\int_1^a \frac{1}{x^2} dx \right] \\ &= \lim_{a \rightarrow \infty} \left[-\frac{1}{a} + 1 \right] = 1\end{aligned}$$

We say this integral **converges** because the limit is a number.

$$\begin{aligned}\int_1^{\infty} \frac{1}{x^2} dx &= \lim_{a \rightarrow \infty} \left[\int_1^a \frac{1}{x^2} dx \right] \\ &= \lim_{a \rightarrow \infty} \left[-\frac{1}{a} + 1 \right] = 1\end{aligned}$$

We say this integral **converges** because the limit is a number.

$$\begin{aligned}\int_1^{\infty} \frac{1}{x^2} dx &= \lim_{a \rightarrow \infty} \left[\int_1^a \frac{1}{x^2} dx \right] \\ &= \lim_{a \rightarrow \infty} \left[-\frac{1}{a} + 1 \right] = 1\end{aligned}$$

We say this integral **converges** because the limit is a number.

$$\begin{aligned}\int_1^{\infty} \frac{1}{x^2} dx &= \lim_{a \rightarrow \infty} \left[\int_1^a \frac{1}{x^2} dx \right] \\ &= \lim_{a \rightarrow \infty} \left[-\frac{1}{a} + 1 \right] = 1\end{aligned}$$

We say this integral **converges** because the limit is a number.

$$\begin{aligned}\int_1^{\infty} \frac{1}{x^2} dx &= \lim_{a \rightarrow \infty} \left[\int_1^a \frac{1}{x^2} dx \right] \\ &= \lim_{a \rightarrow \infty} \left[-\frac{1}{a} + 1 \right] = 1\end{aligned}$$

We say this integral **converges** because the limit is a number.

Evaluate $\int_{-\infty}^{\infty} \frac{1}{1+x^2} dx$

When an integral has multiple sources of impropriety, we break it up into integrals that have only one source each. If all of them converge, the original integral converges. If any of them diverges, the original integral diverges as well.

Evaluate $\int_{-\infty}^{\infty} \frac{1}{1+x^2} dx$

Evaluate $\int_{-\infty}^{\infty} \frac{1}{1+x^2} dx$

Evaluate $\int_{-\infty}^{\infty} \frac{1}{1+x^2} dx$

Evaluate $\int_{-\infty}^{\infty} \frac{1}{1+x^2} dx$

Evaluate $\int_{-\infty}^{\infty} \frac{1}{1+x^2} dx$

Evaluate $\int_{-\infty}^{\infty} \frac{1}{1+x^2} dx$

Evaluate $\int_{-\infty}^{\infty} \frac{1}{1+x^2} dx$

Evaluate $\int_{-\infty}^{\infty} \frac{1}{1+x^2} dx$

Evaluate $\int_{-\infty}^{\infty} \frac{1}{1+x^2} dx$

$$A_2 = \frac{\pi}{2}$$

$$A_1 = \frac{\pi}{2}$$

Evaluate $\int_0^1 \frac{1}{2\sqrt{x}} dx$

Evaluate $\int_0^1 \frac{1}{2\sqrt{x}} dx$

Evaluate $\int_0^1 \frac{1}{2\sqrt{x}} dx$

Evaluate $\int_0^1 \frac{1}{2\sqrt{x}} dx$

Evaluate $\int_0^1 \frac{1}{2\sqrt{x}} dx$

Evaluate $\int_{-2}^1 \frac{1}{x^2} dx$

Evaluate $\int_{-2}^1 \frac{1}{x^2} dx$

Evaluate $\int_{-2}^1 \frac{1}{x^2} dx$

Evaluate $\int_{-2}^1 \frac{1}{x^2} dx$

Evaluate $\int_{-2}^1 \frac{1}{x^2} dx$

Evaluate $\int_{-2}^1 \frac{1}{x^2} dx$

Evaluate $\int_{-2}^1 \frac{1}{x^2} dx$

Evaluate $\int_{-2}^1 \frac{1}{x^2} dx$

Evaluate $\int_0^{\infty} \frac{\cos x}{1 + \sin^2 x} dx$, or show that it diverges.

WARNING: SNEAKY DIVERGENCE

If you don't realize that an integral diverges, you can generate answers that look plausible but are secretly nonsense.

For example, attempting to use the Fundamental Theorem of Calculus in the example $\int_{-2}^1 \frac{1}{x^2} dx$ gives $\left[-\frac{1}{x}\right]_{-2}^1 = -\frac{3}{2}$: a poor approximation for positive infinity!

WARNING: SNEAKY DIVERGENCE

approximate integral from -1 to 1 of $1/x^2$ dx using Simpson's rule

Input interpretation

integrate	$\frac{1}{x^2}$	using Simpson's rule	from $x = -1$ to 1
-----------	-----------------	----------------------	----------------------

Result More digits

0.666667

(using 1 interval)

This mistake can be especially dangerous using computer algebra systems, where you spend less time thinking about the integral and so have fewer chances to notice that something is awry. As of this writing, [WolframAlpha](#) gives no warnings when you ask it to approximate $\int_{-1}^1 \frac{1}{x^2} dx$ using Simpson's Rule: it tells you the approximation with one parabola is $\frac{2}{3}$.

Evaluate $\int_0^1 \frac{1}{x^p} dx$ and $\int_1^\infty \frac{1}{x^p} dx$ when p is constant.

p -test

Let p be a constant.

If $p < 1$, then $\int_0^1 \frac{1}{x^p} dx$ converges

If $p \geq 1$, then $\int_0^1 \frac{1}{x^p} dx$ diverges

If $p > 1$, then $\int_1^\infty \frac{1}{x^p} dx$ converges

If $p \leq 1$, then $\int_1^\infty \frac{1}{x^p} dx$ diverges

$\int_0^1 \frac{1}{x} dx$ diverges

$\int_1^\infty \frac{1}{x} dx$ diverges

$\int_0^1 \frac{1}{x^2} dx$ diverges

$\int_1^\infty \frac{1}{x^2} dx$ converges

$\int_0^1 \frac{1}{x} dx$ diverges

$\int_1^\infty \frac{1}{x} dx$ diverges

$\int_0^1 \frac{1}{x^3} dx$ diverges

$\int_1^\infty \frac{1}{x^3} dx$ converges

$\int_0^1 \frac{1}{x} dx$ diverges

$\int_1^\infty \frac{1}{x} dx$ diverges

$\int_0^1 \frac{1}{x^4} dx$ diverges

$\int_1^\infty \frac{1}{x^4} dx$ converges

$$\int_0^1 \frac{1}{x} dx \text{ diverges}$$

$$\int_1^{\infty} \frac{1}{x} dx \text{ diverges}$$

$$\int_0^1 \frac{1}{x^{1/2}} dx \text{ converges}$$

$$\int_1^{\infty} \frac{1}{x^{1/2}} dx \text{ diverges}$$

$$\int_0^1 \frac{1}{x} dx \text{ diverges}$$

$$\int_1^\infty \frac{1}{x} dx \text{ diverges}$$

$$\int_0^1 \frac{1}{x^{1/3}} dx \text{ converges}$$

$$\int_1^\infty \frac{1}{x^{1/3}} dx \text{ diverges}$$

$$\int_0^1 \frac{1}{x} dx \text{ diverges}$$

$$\blacktriangleright \int_{\frac{1}{2}}^{\infty} \frac{1}{x^3} dx$$

It is very common to encounter integrals that are too complicated to evaluate explicitly. Numerical approximation schemes, evaluated by computer, are often used instead. You want to be sure that at least the integral converges before feeding it into a computer.

Fortunately it is usually possible to determine whether or not an improper integral converges even when you cannot evaluate it explicitly.

Comparison

Let a be a real number. Let f and g be functions that are defined and continuous for all $x \geq a$ and assume that $g(x) \geq 0$ for all $x \geq a$.

- (a) If $|f(x)| \leq g(x)$ for all $x \geq a$ and if $\int_a^\infty g(x) \, dx$ converges, then $\int_a^\infty f(x) \, dx$ converges.
- (b) If $f(x) \geq g(x)$ for all $x \geq a$ and if $\int_a^\infty g(x) \, dx$ diverges, then $\int_a^\infty f(x) \, dx$ diverges.

Comparison

Let a be a real number. Let f and g be functions that are defined and continuous for all $x \geq a$ and assume that $g(x) \geq 0$ for all $x \geq a$.

- (a) If $|f(x)| \leq g(x)$ for all $x \geq a$ and if $\int_a^\infty g(x) \, dx$ converges, then $\int_a^\infty f(x) \, dx$ converges.
- (b) If $f(x) \geq g(x)$ for all $x \geq a$ and if $\int_a^\infty g(x) \, dx$ diverges, then $\int_a^\infty f(x) \, dx$ diverges.

Comparison

Let a be a real number. Let f and g be functions that are defined and continuous for all $x \geq a$ and assume that $g(x) \geq 0$ for all $x \geq a$.
